Key Features and Benefits

Photocopier compatible

Compatible with virtually all makes and models of photocopier, both black and white and colour. Charges separately for A4 black and white. A4 colour and A3 colour.

Multi coin unit and price lines

Accepts up to six different types of coin (2p,5p,10p,20p,50p,£1) Uses UK sterling and Euros. Up to eight price lines are available.

Suitable for all European countries with multi languages

Can be used in all major European countries and can be programmed in six languages: Dutch, English, French, German, Italian and Spanish. This UK machine can be easily converted by the customer; no engineer is necessary, no extra cost involved.

Easy to use operator functions

Paying for and making photocopies with Minivend 4 couldn't be easier. The scrolling LCD display allows the customer to easily read a set of comprehensive user prompts accessible by a push button menu system. A series of menu options allows the operator to change the price or audit the credit taken. It's low height allows ease of use for wheelchair users.

Scrolling user display

Comprehensive user and operator information is viewed across a scrolling backlit LCD display.

Full audit trail

Full audit trail available on screen or by printout, giving both date and time of use.

High Security

A re-settable record of all transactions is available, helping to prevent fraud.

Override key

Allows for staff photocopying and refunds.

Low maintenance

This floor standing unit does not need fitting to a wall or photocopier. It's large capacity means there is ample daily capacity for the busiest environments.
